SUMMARY

I'm a junior front-end developer and recent bootcamp graduate with several years of hospitality experience. I bring a calm, people-centered approach to building responsive web applications with React, JavaScript, HTML, and CSS. My experience in customer service fosters a user-focused mindset that produces interfaces that are clear, practical, and easy to use. Coming with strong teamwork experience, I know that clear communication, dependability, and supporting one another under pressure make teamwork work. Looking for a junior role where I can contribute thoughtful, well-crafted work and keep growing alongside experienced developers.

SKILLS

React | JavaScript | TypeScript | HTML | CSS | Responsive Design | Node.js | Express.js | MongoDB | REST APIs | Authentication | CRUD Operations | Git | GitHub | Postman | Agile | Canva

EDUCATION

Software Development Bootcamp, Circuit Stream, *Online* **Oct 2025 – Jul 2026**

The bootcamp is an intensive program focused on full-stack development, API design, and application architecture. Through a project-based approach, built and structured applications using JavaScript, Node.js, Express, and MongoDB.

PROJECTS

Bitewise, Community Food Allergy Dining App, Solo Developer **Jul 2026**

Built with **React, Vite, Node.js, Express, MongoDB, Passport.js**, and the **Google Maps API.**
A community-driven web app that helps people with food allergies find dining options on an interactive map, seeded with real Metro Vancouver restaurants. Wrote a 78-test suite covering front-end components and API routes. Diagnosed and fixed a production outage caused by third-party cookie blocking through a proxy rewrite on Render.

Farcast, Full-Stack Note Management App, Solo Developer **May 2026**

Built with **React, Material UI, CSS Modules,** and the **OpenWeather One Call API.**

A responsive weather app that presents forecasts in a clear, easy-to-scan layout. Uses React Context to keep preferences and weather data in sync across screens, caches data in localStorage for 30 minutes to limit API calls, and handles time zone aware date grouping for the 5-day forecast.

Slate, Full-Stack Note Management App, Solo Developer **Mar 2026**

Built with **Node.js, Express.js, MongoDB, Mongoose, Passport.js, bcrypt, EJS,** and **vanilla JavaScript.**

Full stack note taking web app with secure user authentication, full CRUD functionality, and category-based organization. Features dark mode, session management, and account deletion with password confirmation.

PROFESSIONAL EXPERIENCE

Queen Charlotte Lodge (QCL), Haida Gwaii, BC

Front of House Supervisor Jan 2025 – Feb 2026
Bell Ringer Lead (Seasonal) May 2024 – Sept 2024
Totem House Hostess (Seasonal) May 2022 – Sept 2023

- Collaborated with department leaders across operations, culinary, housekeeping, and guest services to coordinate daily operations and deliver seamless guest experiences.
- Led nightly operations for a team of 8-10, coordinating service for 100 guests while providing guidance and problem-solving in a fast-paced environment.
- Coordinated cross-functional events, aligning staffing, logistics, timelines, and guest requirements to ensure successful execution.
- Delivered personalized, guest-centered service across all venues, adapting to dynamic guest needs through clear, attentive communication.
- Developed a reusable sales trend tracking workbook with structured inputs, formulas, and visual charts to compare venue performance across seasons.
- Independently led end-to-end implementation of a Learning Management System, developing training materials and SOPs to support onboarding 35 staff and securing team approval before rollout.
- Contributed to a QR-accessed self-guided mobile walking tour, organizing station content, coordinating imagery, and planning guest-facing digital touchpoints across eight stations.

Cactus Club Cafe, Richmond, BC

Server, Trainer Oct 2018 – Apr 2022

- Collaborated daily with fellow team members, communicating clearly and supporting teammates to keep service moving through peak hours.
- Supported teammates during high-volume shifts by proactively identifying areas to support, redistributing tasks, and adapting to changing priorities.
- Trained new hires on workflows, standards, and POS systems, accelerating ramp-up and team consistency.
- Mentored new employees through hands-on training, constructive feedback, and ongoing support.
- Trusted with opening, closing, and large-event shifts, coordinating with kitchen, bar, and host teams.
- Delivered guest-centered service in a fast paced environment, troubleshooting issues calmly while balancing competing priorities.
